**Abstract.** In the article speech normative development stages, to autism played children speech of violations causes, symptoms the first in line transportation social to factors based, correction the work system in the organization how to factors attention need to focus and to autism played of children to himself special aspects separate shown.

**Keywords:** Autism , Asperger syndrome , Rett's syndrome, symptom , etiology. correction, stress, parenteral, natal, postnatal

## INTRODUCTION

This in the article - Autism played children speech, speech in moderation of a child's speech differences, autism cause issuer factors , Autism term , Autism with sick children speech development about data illuminated . In the article pedagogues, speech therapists-defectologists for necessary recommendations giving passed. Also of autism ontogeny, etiology about data open given

Autism about concepts, Autism with sick children speech development about the following in the literature given data analysis done and illuminated. In the article pedagogues, speech therapist - defectologists for necessary recommendations giving passed. Also of autism ontogeny, etiology about data given .

T. A. Vlasova , NASipina , KSLebedinskaya , GPBartn , MTDunayeva

S. D. Zabramnaya , GB Shoumarov, KK Mamedov, GB Shoumarov , VPPodobed , MY Ayupova and ZM Akhmedova in his studies autism and his come output , correction works and conducted studies analysis cause passed .

However , this speech violation was in children word to make skills formation issues enough not studied , to autism played in children manifestation divisor speech violations eliminate reach and his to himself special features according to experimental data No. To autism played in children speech defects correction according to data enough not formed .

In the article to autism played in children manifestation divisor speech violations . Autism played in children correction the work system with depends has been problems and their basis illuminated .

A child with autism around different look with looks To the data according to now in the world of every 88 children in one autism observation can Such children external apparently from others difference does not , only it is special thinks Autism to the disease played children with work methods about today useful data giving we will pass .

Autism ( from Greek "autos" means " myself " ) . word ) is of the psyche to himself special status is a patient external world , people around with communication to do does not want He is lonely likes

Another one different behavior and so the words repeats . Autism Diagnosed child in the world lives Thinking to others it doesn't look like Theirs behavior is a real reality with dependent it's not . Patients in his actions emotional experiences main place holds This is a disease syndrome son of a bitch in children girl to children relatively a lot occurs . Symptoms each variety and disease variability this the disease because of the difficulty proof gives : imperceptible autistic properties to constant until care is required .

Autism the disease come exit reasons with depend

Scientists according to autism cash register come exit reasons one this is the fetus mother in the womb during known one kind of of proteins deficiency . Second the reason is in the body two different heavy of metal , lead and mercury , increased leaving Third reason surroundings environment ecological violation and pregnancy during strong stress situations forgive Anemia and blood of pressure increase in the kidney pressure increase - these all my autism come exit reasons is considered From this except autism disease of signs expansion , that is from development behind to stay symptoms of Retta's syndrome , Asperger's syndrome and of autism classic symptom of complexes many p meeting Also a disease about information is increasing . Before Shy , shy , introverted and to schizoprenia inclined children are " abnormal ". children " they said if , the present to the day come such the children autistic children say ( autism ) .

Autism disease to age looking to the following is divided into :

Early childhood autism - up to 2 years ;

Childhood autism - up to 2-11 years ;

I'm from Smyrna autism up to 11-18 years old .

Autism signs

- Social backwardness ;
- In communication by itself with talk , har different hand actions to do
- General of characters early Beginning .
- Child's to his mother attentiveness ( laughter , physical actions , voice releases ) ;
- Child's state of " preparation " . the absence of ie him to raise when trying his hands not stretching , in the knees not trying to stand up , from sucking Entirely to stop
- Team with to play Reluctance , parents and others with when playing a whim do , alone without to play to want
- Sound , light has been of sensitivity increased to leave , from this except scare , shout , bully to fly such as games during whims to do
- Speaking of ability waning , even mutism as of now . Echolalias , that is the words repeat , from parents heard expressions repeatedly telling walking or in the cartoon heard the words always telling walk , this is Asperger's syndrome is called ;
- Food choose eat , appetite laziness , sleep deterioration ;
- Commands non-fulfilment , items if it shows don't look at , own to the name attention not to give ;
- Marked in order strictly compliance to do , that is one at the time awakening , items one in the place storage , bodies to the shape looking sorting and that's it such as
- Speaking of ability obvious violation adults such as expressions using to speak , one different the words repeating to walk , to dialogue do not enter ;
- From dangers fearlessness : heights , highways , animals fear not , but simple from items fear , for example boiling standing kettle , electricity lighter and that's it such as
- Actions repeats turning around standing , shaking posture , gestures repetition ;
- Anger , laughter , panic by itself appear to be

• Some one unnatural to the circumstances attention focus , e.g remembering to stay difficult has been numbers remembering stay , songs words remember save , read which cannot be records to write

I'm from Smyrna in autism to the characters autistic hormonal changes are also added . Diagnosis only to the characters Based on the psychiatrist doctor he ate . Many autistic children in the literature given autism to the signs suitable not coming can Some cases of autistic children people with they also engage in communication it is possible while diagnosis in putting difficulties gives birth. That's right organized correction pedagogical works own the result of course shows. In development shortcomings significant level eliminate to do service does
