

The Role of People's Traditions and Values in Enhancing the Primary Education Process

*Djurayeva Salomat Nabiyeвна*¹

Annotatsiya: primary education in the process of this article, the importance of national traditions and national values illuminated. The formation of the spiritual discipline of the readers with the help of people pedagogical tools, methods to increase the sense of national culture has been in respect of the analysis. Also, the people's spiritual traditions and values in the educational process through the integration of effective approaches to enrich the world of readers recommended. In the article national tales, folk games and educational opportunities of the ceremony and their primary analysis of the experience of implementation of the educational process was discussed in class.

Keywords: primary education, national traditions, national values, the people of pedagogical students of education, national culture, people, games, fairy tales, moral education.

To enter. The use of samples of students in primary education etnopedagogik their nation's historical, cultural, and gives you the opportunity to learn the moral values. It's their children through the native language, national literature and art they love, as well as the people of the ancient customs, traditions and lifestyle to learn. The main purpose of etnopedagogik technique – the nation's good as a person from taking advantage of the educational experience of children trained.

Modern technology have been developing in all areas of our life. The role of technology in the education system, the day-to-day increasing. Computers, internet, multimedia tools, educational programs, increasing the effectiveness of modern technology is an important tool for readers like mastering mobile apps. Teachers of modern technologies in their work through the effective application will provide to the students the process of learning more interesting and interactive.

Etnopedagogik of the sample to integrate into the education process with the help of modern technology plays an important role in increasing the readers knowledge. For example, through the use of interactive educational technologies to students of folklore works, people tales, songs, folk art and more effectively guide materials can learn. Also, to get acquainted with the cultural heritage of the people of using multimedia tools, traditional games for children, fairy tales, folk songs and stories allows you to teach in an interactive way.

Interactive education tools – this mutual understanding between teachers and pupils, there are technologies which will help you to organize the activities. They are the readers mind, the development of a creative approach allows the formation of them. For example, a "smart board" (smart device), using the teacher together with the children the tale of the people, the people of the song of the legend of the display, analyze, and children in the learning process can be an active part of them.

Multimedia tools and video materials in the students acquainted with the rich cultural heritage of the Uzbek people is an important adjuvant. For example, etnopedagogik works, folk art, traditional games and video for children about the ceremonies and the provision of materials to teach the process more fun and will live. Many children through the video of the people of the traditions, the customs will be able to see in a visual way.

Mobile applications developed special materials for the study of children using mobile phones and tablets etnopedagogik. Through this app, people, kids tales, songs and stories in an interactive way can learn. Also, there are options for teachers to create materials and use them effectively etnopedagogik.

Online learning resources can also be an effective means of studying materials etnopedagogik. Folk tales, legends, songs, folklore created a special online platform to the teaching of genres. In this platform, students can see their behavioral respectively materials, practical exercises to learn and they can carry.

Etnopedagogik applying modern technologies in education, the students it is important to understand and respect him in the formation of their cultural heritage. Pedagogy of the best samples of people, for example, folk tales, songs and legends through integration into the education process, students learn a deeper rich historical and cultural heritage of the people of their own. Modern technology allows you to make this process more effective and interesting.

Currently, the use of modern computer technology in secondary schools of opportunities for improvement in the process of education full use of the opportunities of modern technology is one of the most important indicators mature teachers were recognized by scientists, and it is a secret to no one. In Particular, U. Sh.Begimkulov in the educational process and create an environment that can meet the modern requirements a multimedia computer information in the learning process, the necessary information of the computer technique using the add tizimlashti to use which is recommended to create a database for storage and parking. Ta'a didactic tool in the process of education sifatidafoydalaniladigan are a special form of software on the market. Currently umumtaa'placed on the internet there are many applications that can use in lessons of education. You can add sirasiga these e-textbooks in the first place. Allows you to use a variety of interactive computer technologies in the character of the instructions. For example, placing xronologik students sequence events, science terms and concepts related to or comment on the terms right and left in the row of m anda', respectively, towards the subject, the words fill in the base with the arrows show or nosi, the performance of test assignments, assignments of using multimedia on the big screen was put krosvordlarni like charging how do comparing with the answer, knowing will be able to go. A teacher's lesson in the process of using the computer in the form of a variety of materials available: slides, video and audio of the piece, diagram, tables, see music is provided. The process of using computer lessons of "psychology and pedagogy in the modern world called the" scientific, distance, and online conferences to be presented to the imagination of the pupils memory strong ta'secret make the process easier to remember, to process the lesson interesting by turning this supposedly allows readers to access and participate in events, or historical period. T by applying the techniques of interactive lessons ina'education-education review, we will describe our thoughts and on giving. Primary class introduction of modern methods of teaching on the basis of our thoughts on some topics we will describe. "Videotopishmoq" method – this method is the use of the following sequence of actions must be performed:

- to the attention of students teach students: the essence of the subject is demonstrated, allowing multiple lighting no comments videolavha to help fine;
- each sheet students in the process of considering how comments reflect;
- the essence of the process are recorded into notebooks;
- recite the answer to the question given by the teacher.

The use of modern information and communication technologies in the primary school readers, independent thinking, creative and logical expansion of research in the lesson and tie in with the lesson to learn along with them fikrlashlarini will help to increase interest in life. Created on the basis of such effective modern requirements of teachers from the conditions of using information and communication technologies and advanced lessons t be established on the basis of ofa'education-guarantees the quality of the educational process. It is noteworthy to say that, as a result of the

application of multimedia applications in each course educational independent, is the further development of creative thinking.

As it is known, the introduction of new information technologies in education and advanced training sessions increase the effectiveness of remain, despite the fact that the achievements in the practice of science by applying independent and logical thinking, harmonious plays an important role in nurturing a person of high moral character. At present, the use of interactive methods in the educational process and information technologies in the educational process of interest to be applied in the day-to-day are increasing. Such is one of the reasons the economy is in the same time be taught in traditional education students only until ready to possess the knowledge, the use of modern technology, while they take to themselves the knowledge that you seek, find, independent learning and thinking, analysis, the final conclusion to come out by themselves, even also teaches. Primary school teaching lesson is organized on the basis of governors of the latest technologies in the process of reading is the ability to form free and independent. As a result of the formation of independent thinking to students around the world, in society and law, as well as positive and negative human consciousness through the qualities of the heroes in the game, a deep study of knowledge, broad thinking, in the form of appropriate decision making skills. The use of the content of education set educational technology, education and forms of preparation tools, readers, and directed the development of spiritual qualities assignments possess extensive knowledge in the development of the system, determine the level of education and the result of mastering them is organized as objective functions for the assessment test preparation objects. Teaching students in the primary grades the effective organization of educational technology in the content, form and methods of proper and efficient use of educational technology tools in teaching, conducted in the field of education for the updates to achieve guaranteed results learn to use them in practice describes the importance of practical work. The process is incredibly complicated because of the effectiveness of the process of education and the reader faolliligiga teachers for education of the means of existence, of the education process, organizational, scientific methodical perfection depends on. Today the new pedagogical and information technologies in the educational process requires the use of advanced teacher continues. Interactive techniques through the application of the policy on the basis of experience in our lessons we will describe the way to give our thoughts on education. It gives practical help in increasing the effectiveness of our colleagues think the classes. Also, the direction of selection and preparation of their readers, in the form of independent life skills has become one of their close ko'makchi responsible for the fulfillment of duty.

Conclusion. Sample etnopedagogik an important tool in the effective use of modern technologies in primary education to the students of the cultural heritage of the people of their own provides an effective approach in teaching. Online lessons, mobile apps, and visual methods to teach etnopedagogik knowledge through virtual tours, educational plays a big role in the development of national values. Also, the integration of computer technology education increases the interest and motivation of readers to the process of their education to improve attitude.
